

COMPANY PROFILE

KARL HEINZ DIETRICH INTERNATIONALE SPEDITION DEVELOPING AND OFFERING PROFESSIONAL AND FLEXIBLE LOGISTICS SERVICES

K. H. Dietrich Germany is operating in Romania since the sixties, as a container carrier, that is carrying out combined transports for the light industry products to USA and Canada.

The German company has at present 58 years of experience and owns a complex net of offices all over the world: Germany, Eastern Europe, South America, North America, Asia.

In December 1994, KHD Romania was established, and for two years was concentrating on international transports and creating a dedicated 20 tones trucks fleet, handling not only combined transoceanic shipment but also European cargo traffic.

In the summer of 1997, the company moved the office from the Western part of the city to Otopeni area, on National Road 1. In the same year the company decided to extend its activity and services, and purchased the first piece of land in Otopeni ring area.

In 1998 the new office building and the first 4000 sqmtrs warehouse were built and equipped with racks for 10 meters high storage. In the year 2000 the second Bucharest/Otopeni warehouse had been built and by the end of the year the company had 120 employees.

Next year – in 2001, stepping into a new strategy, the company purchased land, built and opened a 5500 sqmtrs warehouse in Brasov. In this warehouse are stored, under monitored quality conditions (16°C and 55% humidity) confectionery goods, in accordance with warehousing, handling, storage and transportation quality regulations of the client.

KHD is providing the following logistic services, adapted to the specific nature of each customer-company:

- international transport – by all means of transportation
- customs clearance
- warehousing

- picking, packing, co-packing an promotion preparation
- distribution all over the country in 24 hours
- warehouse management system: stock, locations, FIFO, lot traceability, transport routes optimisation

All warehouses are built using the high standards and technology of Canadian industrial constructions, and have the following features and equipment: height of 10 metres, five level racking system, adjustable partition of the space using detachable separation walls, thermal insulation, sprinkler system, office-type fire resistant false ceiling, adustable dock levellers and inflatable dock seals for the protection of merchandise during the unloading and loading, etc.

Presently the company has 400 employees in Romania, operating the 4 warehouses in Bucharest of totally 20.000 sqmtrs and the Brasov warehouse. The company has also opened offices in Bacau and Arad in order to serve the customers located in these areas.

A second warehouse will be finalised in January 2005 in Brasov and afterwards a new one will be built in Sibiu.
